Curriculum Vitae

I designed my own Curriculum Vitae using React Js and Tailwind CSS.

The screenshot shows a web application interface for an e-commerce platform. At the top, there is a header with the logo "sns.clo", a search bar, and buttons for "Login" and "Register". Below the header, a product card for "Amai Midi" is displayed. The card features a red "New" badge, the product name "Amai Midi", the original price "Rp 110.000,00", and the discounted price "Rp 99.000,00". It includes details like "Ukuran: LD 110 cm PB 120 cm" and "Stok Tersedia: 12 Pcs". Buttons for "+ Keranjang" (Add to Cart) and "Beli Sekarang" (Buy Now) are present, along with a favorite icon. To the right of the product card is a photograph of two women modeling the "Amai Midi" dress. Below this, a horizontal ellipsis indicates more products. The "Best Seller" section follows, featuring two more product cards: "Tisa Dress" (Rp 125.000,00) and "Siuti Dress" (Rp 120.000,00), each with its own image and stock availability information.

SnSclo E-commerce

Currently, I am building my own e-commerce project for my wife's business. I am building SnSclo e-commerce using React Js with Redux-Toolkit and Tailwind CSS as Front-End and Laravel 9 as Back-End.

Special For You

Tripwe

My job at PT Tripedia Global Adventura as Front-End Developer is developing Web Apps tripwe.com. This Web Apps use Vue Js and Tailwind CSS as Front-End and Laravel as Back-End.

Sola Gracia Accounting Application

In PT Tripedia Global Adventura, I was responsible to handle Sola Gracia Accounting Application Project by myself. I used Laravel 9 framework to made this web-based application.

yskk.org Website

For 2 years I worked at the Satu Karsa Karya Foundation, one of my jobs was developing the organization's website. This website uses the Laravel 5 framework with blade as front end.

The screenshot shows a web-based application interface for managing products. On the left is a sidebar with various menu items: Dashboard, Upload, Arsip, Sent, Merk, Kategori, Kalkulator, Pendapatan, Keuangan, Rekap, and User. The main area is titled 'Upload Produk' and contains fields for 'Nama Produk', 'Judul Produk', and 'Deskripsi Produk'. There are also dropdown menus for 'Jenis Kategori' and 'Attribut Lainnya'. A section for 'Bahan' and 'Motif' has input fields and dropdowns. A large red 'Submit' button is visible. The top right corner shows a user profile for 'Muh Syaiful Adli'.

Web-Based Application snscl.my.id

Website snscl.my.id is my web-based application to help upload products on shopee using the CodeIgniter 3 framework. This is supposed to support my wife's business. There are 3 levels of users on this website: Supervisor, Admin and Uploader.
